

### Smart, Simple, and Super Easy

The AirCard 785S mobile hotspot lets you connect up to 15 WiFi devices almost anywhere you go. It's simple, yet smart with powerful features behind the scenes such as Dual-Band WiFi ensuring the best speed and performance. With up to 10 hours of battery life, a data usage meter, and a handy NETGEAR AirCard App to manage device and network settings, the AirCard 785S is sure to please frequent travelers, families, entrepreneurs, and more.

### Key Features

- 4G LTE/3G/2G support
- Dual-Band WiFi
- Data usage monitoring
- Up to 10 hours of battery life
- Connect up to 15 WiFi devices
- Colour LCD display
- Guest WiFi
- AirCard App compatible

### Highlights

#### Super Fast Speeds On the Go

Ensure top performance and bandwidth for all your online activities. Connect to 4G LTE speeds where available, and leverage Dual-Band WiFi for greatest range (2.4GHz) and performance (5GHz) while minimizing interference from nearby devices.

#### Super Easy to Use

The AirCard 785S mobile hotspot connects up to 15 WiFi devices, like your smartphone, tablet or printer. Just power on, connect and browse! It's equipped with a vivid LCD display which shows all the need-to-know things about your device such as battery life, network connectivity and data usage.

#### Manage With Your Smartphone or Tablet

With a clean design and super easy navigation, the AirCard App lets you manage your mobile hotspot and its connection from your smartphone or tablet. Check your network connection, view connected devices, or power off your mobile hotspot.

Learn more or download the complimentary App today for your iOS or Android device from [www.netgear.com/AirCardApps](http://www.netgear.com/AirCardApps).

#### Track Your Data Use

Managing your monthly data consumption is critical. So we've designed three easy ways to monitor it. The easiest is to just view your data usage on the LCD display. Alternatively, you can view data usage through the AirCard App, or by logging in to your mobile hotspot home page through your web browser.

#### Reliable and Secure

Share WiFi without worry by creating a guest WiFi network for others to join. This saves you from sharing your WiFi password, and lets you disable the guest WiFi when it's no longer needed. In addition, AirCard 785S is designed with the securest WiFi encryption modes, and lets you block unwanted devices from its network.

#### Accessories

Complete your mobile hotspot with accessories that charge battery, strengthen signal and extend coverage – at home, in the office, or on the road. To learn more about our latest accessories such as the AirCard Signal Boosting Cradle, please visit

### Technical Specifications

#### Network Technology

- FDD LTE Rel. 9 Category 4

#### Bands

- 4G LTE FDD 700/850/1900/2600/AWS (1700/2100) MHz
- 3G 850/1700/1900/2100 MHz
- 2G 850/1900 MHz

#### WiFi Features

- WiFi 802.11 b/g/n, 2x2 MIMO
- Dual-Band WiFi 2.4GHz/5GHz
- Multiple SSID/Guest WiFi support
- WiFi Protected Setup (WPS)

#### Device Display

- 1.77 inch LCD Color Display

- Data usage meter
- LTE/4G/3G network info/status
- WiFi network info/status
- Battery life
- Basic WiFi configuration
- Alerts and notifications

#### Security

- WiFi security encryption
- WiFi Protected Setup (WPS)
- Create and edit guest WiFi network
- View and block WiFi devices
- Password protected UI administration
- Turn off WiFi or USB tethering

#### Dimensions

- 110 mm (L) x 69 mm (W) x 16.6 mm (H)

#### Weight

- 127 g

#### Battery

- Removable lithium-ion (2000 mAh)
- Up to 10 hours of continuous use
- Up to 300 hours on standby

#### Environmental

- Operating temperature: 0 to 35° Celsius
- Storage temperature: -40 to 85° Celsius

#### Package Contents

- NETGEAR AirCard 785S Mobile Hotspot
- Lithium Ion Battery
- AC Adapter and USB Cable
- Quick Start Guide

### Compatible Accessories

- 4G LTE Signal Boosting Cradle with Ethernet (DC113A)

- MIMO Antenna
